DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Title:

The title has been changed to - - A METHOD OF ASSEMBLING AN INTERNAL COMBUSTION ENGINE - -.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to teach or fairly suggest the series of steps recited, particularly the steps of placing as assembly comprising a crankshaft, connecting rods and pistons into a crankcase through an open top and compressing the piston rings on each piston to fit into bores of a cylinder block from the bottom surface of the block while releasing the compression of the rings as they are received into each respective bore and attaching the crankcase to the cylinder block.

Regarding claim 8, the prior art fails to teach or fairly suggest the series of steps recited, particularly the steps of placing a crankshaft with plurality of attached connecting rods and pistons with piston rings through the open top of a crankcase with pistons and piston rings and a portion of connecting rods extending above the open top

Art Unit: 3726

and simultaneously compressing all of the piston rings with a compression fixture and inserting the pistons with the compressed rings into the bores of the cylinder block from the flat bottom side of the block and removing the compression fixture and lowering the cylinder block with the inserted pistons for attachment to the crankcase.

Regarding claim 9, the prior art fails to teach or fairly suggest the series of steps recited, particularly the steps of simultaneously compressing the piston rings on all of the pistons to fit into the cylinder bores and placing the cylinder block with respect to the pistons so that its bottom surface is in a plane parallel to the co-planar piston top surfaces and inserting the pistons through the bottom surface into the cylinder bores with the pistons rings being released from the compression as the rings enter the bores.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sarang Afzali whose telephone number is 571-272-8412. The examiner can normally be reached on 7:00-3:30 M-F.
